Please follow the instructions below to create an RMA request with Palo Alto Networks.

1. Create a case online (<https://support.paloaltonetworks.com>). If the issue is critical, create the case online then call Support with the case number ([see here for Phone support numbers](#)).
2. Once the RMA is approved, you will receive a notification in the Customer Support Portal (CSP), requesting validation of the delivery address.

CSP Address Verification Alert Notification

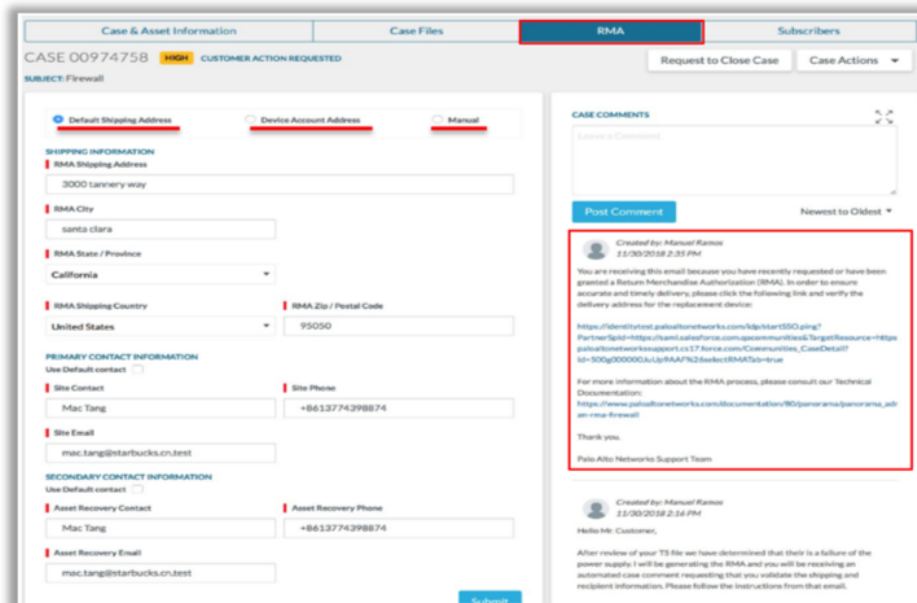

3. You will also receive an email, notifying you about the address verification alert.
NOTE: If the delivery is to India or Brazil, please provide the GSTIN or CNPJ tax numbers in the case comments on RMA Tab.

RMA Address Verification Email Notification

4. The notification in the CSP and your email will guide you back to your RMA case, so you can enter the shipping address in the RMA Tab. You will have a choice to select one of three address options:

- Choice 1: Default Shipping Address (the address that you listed when the account was registered) OR
- Choice 2: Device Account Address (the address you provided when the device was registered in the Support Portal) OR
- **Choice 3: Manual (manually enter appropriate shipping address)**

CSP RMA Tab Screen

5. Click **Submit** when the address is complete. The RMA team will be notified, and your replacement order will be submitted. You will also be able to post comments about the process on the right side of the screen.

PLEASE NOTE: An address cannot be changed after you click **Submit**. If an address needs to be changed, update the case comments or [call Support](#) to advise the change as the automated shipping process will have already begun.
